

# Tanita Segmental Body Composition Analyser

Model : TIMC980MA

Tanita Body Composition Analyser featuring multi frequency technology for segmental body composition analysis. Ideal for medical practitioners, medical research, hospitals and fitness centres.

## FEATURES

TIMC980

- state of the art technology including multi frequency analysis, colour touch screen technology and Microsoft® Windows® real time operating system
- segmental analysis for each leg, arm and trunk including body balance, fat distribution and reactance/resistance assessment allowing in-depth trend consultation
- 2 user modes: standard (5 to 99 years of age) and athlete (18 to 99 years of age), both male and female with height range of 90 to 250cm
- user friendly and designed to be used as a stand alone unit allowing clients to take a measurement without assistance thanks to the extra large interactive touch screen display
- six frequencies allow heightened accuracy using the latest Tanita equations
- increased maximum weighing capacity of 300 kg and auto calibration before each and every analysis ensures optimum reproducibility of measurements
- full segmental body composition analysis taken in under 30 seconds
- a modular system for convenient transportation. The interlocking system can be set up in under 5 minutes
- New Zealand Register of Medical Devices (WAND) #101129-WAND-6A43MB
- Australian Register of Therapeutic Goods (ARTG) # 142294
- net weight 33 kg
