

Pallet Jack Scale

Model : WSPJS2000

The WSPJS2000 pallet jack scale will help increase efficiency and reduce labour costs associated with weighing pallets. Pallets can be weighed on the spot, without the need to use a forklift to load pallet onto a platform scale.

The WSPJS2000 is suitable for most wooden and plastic pallets, and a maximum capacity of 2000kg. It offers an internal rechargeable battery and has a bright easy to read 30mm LCD display with back light, making it suitable for low light warehouse environments.
