Health Monitoring Software
Model : TIGMONSW

Easily connected via RS232C or USB, TIGMON Health Monitoring Software captures and stores body composition details against your clients and patients.

It provides professional reports and printouts, trend analysis of composition measurements against time, and much more. This software is invaluable for health care, weight management, and sports & leisure facilities.
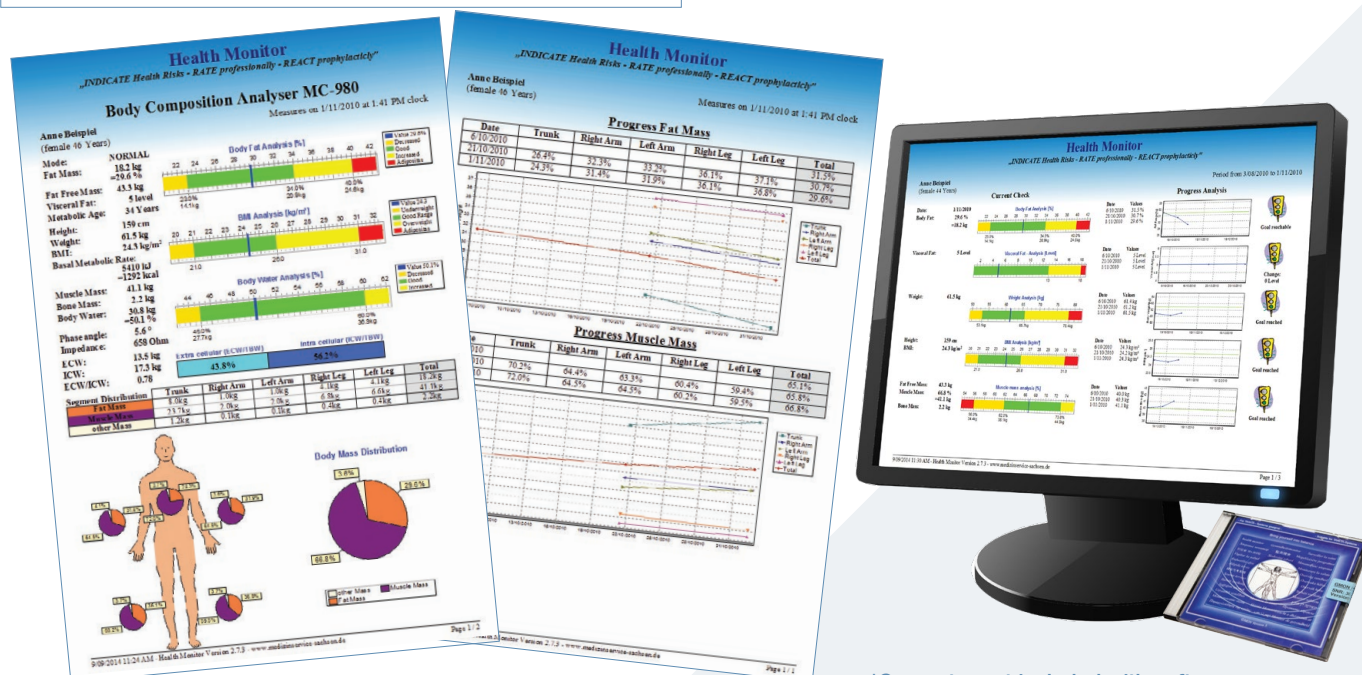

FEATURES   TIGMONSW

- designed to be used with Tanita's professional range of body composition scales
- client data is automatically transferred from PC to body composition monitor
- generate a variety of reports and printouts
- chart client progress and trends
- ideal for use in health screening, weight management and fitness assessment
- connected via RS232C or USB
- compatible with Windows operating systems

SCALE MATCH

TIGMON Software is compatible with the following current models of Body Composition Analysers.

- TIDC360S
- TIMC580
- TIMC780MA
- TIMC980MA
- TISC240M

Computer not included with software
