

Continuous Band Sealer

Vertical

Model : WSCBSV

Our stainless steel vertical continuous band sealing machines speed up production and make light work out of sealing plastic bags and film. The optional embossing attachment enables date and lot coding to be applied in the seal. These reliable machines are engineered for many industries including; food, medical, cosmetics and componentry.

FEATURES

WSCBSV

- suitable for sealing small packages
- durable stainless steel construction
- easy to use as the operator only needs to feed the bags or material into the machine
- temperature controller ensures consistent temperature throughout the operation for quality sealing
- temperature can be adjusted to suit the job at hand
- conveyor belt speed regulation
- sealing direction is left to right
- distance between the between conveyor and sealer can be adjusted to suit the item currently being sealed

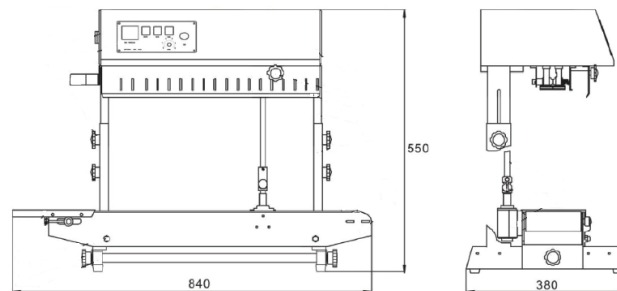

OPTIONS

- horizontal model available upon request (WSCBSH)
- embossing attachment
- counting device
