SM6000SP Self-Service Weigh Labelling Scales

MODEL: SM6000SP

Faster, smarter weigh labelling with innovative eco-labelling and Bring-Your-Own-Containter (BYOC) options.

SM6000SP Self-Service Weigh Labellers enhance customer experience and support eco-lifestyle choices with smart sensor technology, innovative labelling and Bring-Your-Own-Container (BYOC) options.

SM6000SP Weigh Labellers are redefining the new normal for self-service offering an innovative approach that brings speed, convenience and adaptability needed in today's retail sector.

These innovative Self-Service Scales provide shoppers with the ability to use reusable containers and purchase just the amount they need, reducing both food loss and plastic waste from single-use containers.

DIGI's unique e.Sense technology sets a new standard in customer experience by removing the need to manually look up product.

The large portrait SM6000SP colour touch screen allow users to intuitively navigate the system without operator assistance making their shopping experience easy and hassle-fee. And DIGI's innovative labelling solutions and BYOC options complete the solution to provide an easy-to-use self-service weigh labelling system that supports both your environmental goals and your customers' eco-lifestyle choices.

TARE
1 Select "Empty Container" to tare container weight. A number label will be printed. Attach this label to the container.

FILL
2 Dispense the desired amount of your selected item.

CONFIRM
3 Select "Filled Container" to AutoTare and then select the same number as label issued.

PRINT
4 A new label will be printed. Attach label onto your container.

e.Sense

DIGI e.Sense is a motion-activated sensor that can be installed on a container or dispenser to enable automatic transmission of the PLU code to the scale.

- improves customer experience
- eliminates human errors
- incredibly compact and easy to maintain
- effectively reduces shrinkage

Bring-Your-Own-Container (BYOC)

SM6000SP Self-Service Scales give retailers the opportunity to provide shoppers with sustainable and convenient BYOC options.

Register container weights quickly and easily then recall them when full ensuring customers pay for the product not the container. Keep customers satisfied while staying legally compliant.

- register multiple container weights
- fuss-free weighing process
- eliminate single-use packaging

Enhanced Customer Experience with Innovative Labelling Solutions

Wedderburn's DIGI PC-based scales provide a streamlined and innovative customer experience. They offer store owners smart labelling options that support store efficiency and environmental goals whilst making it easy to comply with food labelling requirements.

Linerless Labels with Auto-Cutter

DIGI's linerless labellers automatically adjust label length used to suit the amount of information being printed. Combined with fitting twice as much label length on every roll due to the elimination of backing paper, and having zero liner waste, you'll save money and reduce waste at the same time.

- flexible label formatting for appealing label presentation
- built-in auto-cutter for clean cut labels
- zero liner waste
- twice as many labels per roll
- fewer label roll changes
- save on storage and logistics costs

Electronic Info Tags

Accurate, versatile and durable, DIGI's electronic shelf labels set new standards in customer experience and store efficiency with accurate and timely price updates and shopper engagement.

- price automation via wireless updates
- easy access to product information with QR Code and NFC capabilities
- high definition ePaper display
- LED flash light for promotions and stock level alerts
- shelf talker attachments
- standard and low temperature info tags available

SM6000 Features Summary
