

# Thermal Printhead Cleaning Kit

Model: BL0606

Our BL0606 Thermal Printhead Cleaning Kit contains everything you need to effectively clean the printhead in your thermal label printers.

The printhead is a critical component of your thermal printer that directly affects print quality, they are also very delicate. Normal printer use results in residue of ink, paper and/or ribbon dust, and in some cases adhesive, to build up on the printhead. Due to the delicate nature of printheads, to avoid costly damage, it's important to follow correct cleaning procedures.

Cleaning guidelines, including an instructional video, are available in our website's info centre;  
<https://www.wedderburn.co.nz/resource-centre/white-papers/thermal-printhead-care>
